Feedback 2 – Felix

M: At first sight what do you think about the concept of our prototype?

F: I think it's a really cool idea for an app.

M: If you could have a look at the chat function, what do you think about it?

F: I think you should change the view a little bit. I think its better if the chat function would look like WhatsApp e.g. So that you have a classic view, which everybody is familiar with.

M: What would you change about the feed function?

F: I don't really know, if I had do say something maybe involve more sport clubs / sport facilities

M: Do you think we can improve the map function?

F: If yes, I don't know how. I think it's perfect this way

M: What do you think about our matching function?

F: Cant say much to the matching function unfortunately. I like the concept though.
